Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in May, 2005 and no WBCR was observed. The stream met the maximum and average depth criterion in the same 1 out of 4 sites. A landowner said that the stream had many deep pools. Because the stream met the maximum depth and average depth criterion at one site and the a landowner indicated that the stream contained several pools that are deep, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
